

SCRAPBOOKING

one month at a time

with Tami Taylor

April

A few facts (from Wikipedia.org):

- April is said to come from the Latin aperire which means “to open”, believed to reference the opening of trees and flowers for spring. But what about people. What are you more open to now than you’ve been before?
- Anglo-Saxons call the month Eostur-monath since the Feast for Eostre occurs this month. What feasts will you have this month? What are your traditional dishes for this holiday season?
- My favorite part of April is that it’s the month as a Daisy for the birth flower. I love daisies. I challenge you to use white & yellow as the dominate colors in your layout.

Did you know?

April’s birthstone is the diamond. The largest diamond found is the Cullinan Diamond. It was 3106.75 carats before it was polished and cut. Can you imagine how large that would be? I bet it was beautiful. I’m not a jewelry fanatic but it’s a diamond, and diamonds are a girl’s best friend right? I challenge you to do a layout about a best friend in your life, the challenge is to write the journaling as if you’re writing a letter to her. Or better yet, write a letter to her copy it for the journaling and mail your friend the original!
